Activate new software modules

1. Activating new software modules is very easy. Connect hardware and start software. Go to "**Purchase modules**" – "**Order new modules**".

Software opens screen with 2 windows – left and right.

In left window – "Available modules" – are shown all available for purchasing software modules.

When your selection is ready, press
"Order" button. Software will save on disc file .ord with your order.

You must send this file to e-mail:

order@mimacar.gr

4. After receiving of payment we will send to you Upgrade file **.mod** .

You have to connect hardware and to start software.

Go to **"Purchase modules"** – **"Install new modules"**.

Software opens window and you have to select received by us upgrade file. That`s all.
